User interviews - £50 voucher incentive

Public Health England (PHE) Digital is conducting research for the redevelopment of the UK National Screening Committee (UK NSC) website and is seeking volunteers to provide feedback. This will help improve people's experience using the website to; look for health screening information, take part in a public consultations, or lobby the government to introduce a new screening programme.

Contact the project's User Researcher Micol Artom, by emailing micol.artom@phe.gov.uk, to register your interest or ask any questions.

You can choose a £50 voucher, for Love2Shop, M&S, Amazon or Tesco, to thank you for your time.

Please note, we will not record names and personal information and will anonymise any feedback you provide. We will group feedback to provide design inspiration and use it solely for this project.

The UK NSC currently makes policy recommendations on screening for: bladder, bowel, breast, cervical, lung, oral, ovarian, prostate, stomach cancer, and 100 other health conditions. Read the [current UK NSC policy recommendations](#).
